Ohhh. Does this have to do with it being a two-year agreement? Same amount per year, on average, but not equal in the two years?

Without seeing the EJ #s I cant tell but the sum of our 15 & 16 federal (\$664,650) is close to the sum of the \$697,663 they show for the two years, which makes me think they may be going with actual awards of funds in a particular year vs what we use as the annual approved amounts. Allen

15 – 332,325
16 – 332,325

664,650
